Smart Café – Product Backlog

1. Introduction

This product backlog includes the main features I plan to develop for my Smart Café application. I have prioritised six user stories to focus on the main functionality first. I will update the backlog as I progress with the project and receive feedback from my lab tutor.

CAFE-01 – Customer Registration
User Story: As a customer, I want to create an account so that I can use the Smart Café application.
Acceptance Criteria:
• Customers can register using their full name, email and password.
• Passwords must match and required fields cannot be empty.
• Invalid details or duplicate emails display an error.
Priority: Must **Owner:** Individual Developer **Status:** To Do

CAFE-02 – Customer Login and Logout
User Story: As a customer, I want to log in and out of my account so that I can access the application securely.
Acceptance Criteria:
• Customers can log in using valid details.
• Incorrect login details display an error.
• Customers can log out and cannot access protected information afterwards.
Priority: Must **Owner:** Individual Developer **Status:** To Do

CAFE-03 – Browse and Search Menu
User Story: As a customer, I want to browse and search the café menu so that I can find the products I want.
Acceptance Criteria:
• The menu displays product names, prices, descriptions and availability.
• Customers can search for products by name.
• Customers can filter products using category tabs.
Priority: Must **Owner:** Individual Developer **Status:** To Do

CAFE-04 – Shopping Cart
User Story: As a customer, I want to add products to my shopping cart so that I can review my order before placing it.
Acceptance Criteria:
• Customers can add and remove products from their cart.
• Customers can increase or decrease product quantities.
• The total price updates correctly when changes are made.
Priority: Must **Owner:** Individual Developer **Status:** To Do

CAFE-05 – Place an Order
User Story: As a customer, I want to place a Click & Collect order so that I can collect my food and drinks from the café.
Acceptance Criteria:
• Customers can place orders when their cart contains products.
• Orders are saved to the database.
• Customers receive confirmation after placing an order.
• Payment will be made at collection.
Priority: Must **Owner:** Individual Developer **Status:** To Do

CAFE-06 – Order Tracking
User Story: As a customer, I want to track my order so that I know when it is ready to collect.
Acceptance Criteria:
• Orders automatically progress from Pending to Preparing, Ready for Collection and Collected.
• Order statuses are updated and saved correctly.
• Customers can view the status of their order.
Priority: Must **Owner:** Individual Developer **Status:** To Do

2. Review and Changes

This is the first version of my product backlog. I will update the statuses as I develop and test each feature. Additional requirements from my PRD, including order cancellation, notifications, order history and customer feedback, will be added as the project progresses.

Any changes requested by my lab tutor will also be recorded and added to the backlog where needed.
